EROL Business Activation Key Free Download

eROLL Business Software is the next generation solution to create, manage and deliver online stores using your web browser! This unique solution revolutionises the way web store development is currently done - and today's commercial market demands that your website uses e-commerce functionality. eROLL Business Software's unique ability to take a static HTML web page and produce an online store is the only solution on the market to provide a solution that integrates with 99.9% of web servers and browsers, and fits in with today's busy business life! eROLL Business Software is the only solution on the market to be able to design and build stores that can be delivered through a traditional web server, a LightSwitch based Flash web store, or a more advanced Content Delivery Networks or web server. eROLL Business Software's complete solution includes an all in one solution, a customisable store builder, an e-Commerce system, a Customer Manager to track customers, order processing, store reporting, and e-Mail, a Phone module, an Order Manager, a File Manager, a content manager, newsletter publishing tools, a Localisation Manager, support and localisation packages, a product descriptions generator, and a comprehensive help system that is unique to eROLL Business Software! With over 30 years experience delivering the highest quality eCommerce solutions, eROLL Business Software is fully backed and supported by an expert technical team with more than 30 years experience! eROLL Business Software's e-Commerce web store tool is easy to use and edit, even for novices - and since there are no programmatic programming requirements, you can create eye-catching graphic designs or use the tool's self-contained WYSIWYG editors!

Advantages of eROLL Business Software: Designed to take advantage of the web server, the light-weight Flash web store tool easily integrates into a web server and presents your website as a web site. Designed to meet web standards and work in 99.9% of web servers. Integrated with eMail, so you don't need an extra mail server or mail software. Integrated with the localisation manager so your site can be localised in 24 languages!

Disadvantages of eROLL Business Software: eROLL Business Software requires a very fast computer and the installation and setup time takes approximately 1 hour. eROLL Business Software requires the Microsoft.NET framework in order to operate - but this is a standard installation! eROLL

What's New in the?

EROL Business is a powerful suite of online store-creation tools that allows you to design, build, update, and manage your e-commerce site with ease. Create, customize, and maintain content for your store in the browser. Your new store will provide great browsing experience, and you'll enjoy a great, productive experience as you create, design, and market your store. Key features include:

- "Breadcrumb-Trail" navigation
- Unlimited product categories and sub-categories
- Works with Macromedia Dreamweaver, WinCool and other page editors
- Basket content summary
- Dynamic Product Search (for products in basket, on category page, or on entire site)
- Smart price tracking
- Multiple product variant pricing (mix/match)
- Product kitting (set-as-you-go pricing)
- Product bundling
- Tax/Duties (import from credit card company)
- Basket-based shopping (user-defined & store-specified basket items)
- Multiple language versions of the website (for multi-lingual shoppers)
- Multiple payment gateways (online and offline)

"Sailthru" - is a graphical interface that helps to make the job of site architects and webmasters much easier, and allows them to focus on what they do best: designing and marketing the site. Sailthru gives you total control over your site, complete with an editor and an interactive visual interface, plus total flexibility in the way you organize and arrange the site content. Sailthru is so user friendly, you'll find it a breeze to use! You'll find the edit and arrange tools intuitive. You will also find that you'll be able to complete more tasks in less time. Sailthru has a special feature that allows you to import and export content for other applications. So, for example, if you have designed content for Netscape Communicator and are now using Internet Explorer, you can import that content into Sailthru and use it in your Internet Explorer-based site. Sailthru features several components, including the following: Navigation Bar Site Map Site Header
